Career Objective

Results driven Systems Architect and Senior Software Engineer capable of assessing and implementing solutions from initial concept and specifications to production environment integration. Excellent and diverse problem solving skills, with an emphasis on creating robust and scalable systems and solutions. Certified strong verbal and written communication skills, capable of addressing both technical and non-technical audiences and individuals. Seeking an interesting and challenging career track working alongside management, development, and systems integration personnel.

Experienced In:

- Web application development at all levels using diverse technologies, including database design, site interface design, web services, and cross browser client side dynamic scripting
- Working with a diverse collection of systems and architectures, and in unifying them into consistent and more user friendly systems and interfaces
- Project requirement specification and scope management
- Desktop application development, specifically targeting Microsoft architecture and the .NET Framework
- RDBMS database design and implementation, familiar with many diverse database systems
- Online marketing campaign management and optimization for maximum impact and visibility
- Working in a fast paced environment with ever changing project specifications and scope by utilizing very strong organizational and analytical skills
- Effective and clear communication with both technical and non-technical individuals

Employment

Marco Photo Service, Inc., Mansfield, OH August 2000 – Present

Lead Programmer (Business & Production Systems, Web Site, & all 3rd Party Systems Integrations)

- Re-engineered all business and production systems. Migrated all systems from outdated dBase systems to modernized SQL Server based systems throughout the entire organization.
- Significantly streamlined production work flow, allowing for the reduction of the overall workforce from over 500 personnel to only 100 personnel during peak production periods.
- Re-engineered company web site to allow for online ordering and real time customer order tracking. Technologies used included HTML, CSS, ASP.NET, AJAX, Web Services, SQL, XML, JSON, Javascript, jQuery, and jQueryUI.
- Integrated multitudes of 3rd party software solutions in order to provide seamless data transfers in real time between production and business systems, including shipment processing, finance, and quality control systems.
- Configured, implemented, and managed all server appliances, including over 100TB of online storage systems. All systems maintained with 99.9% up time, and with zero data loss.
- Configured, implemented, and managed a 100% reworked network infrastructure, delivering full 1GB connectivity for all clients, and 10GB throughput capacity for all server appliances.
- Configured and implemented network perimeter security and VPN policy. To date there have been zero successful network security breaches.

Omneye Dev Systems, Shelby OH Sept 2008 – present

C.E.O. & Chief Solutions Architect (Oversee administrative duties, chief developer for client solutions)

- Manage all administrative operations, including contract negotiations, and ensuring that projects are completed both on time and at or above client specifications.
- Perform freelance web and system design services using a wide variety of technologies, including but not limited to: HTML, CSS, JavaScript, jQuery, jQueryUI, AJAX, SQL, ASP.NET, Web Services, JSON, XML, and PHP.
- Provide solutions for both Windows and Unix/Linux based environmental needs.
- Work with a large variety of open source content management and e-commerce systems, including but not limited to: Magento, WordPress, Joomla, CMS Made Simple, among others.
- Work with online payment processing gateways including both Authorize.net and Paypal's payment processing gateway APIs.

Pervasive Marketing, Golden, CO October 2008 – February 2011

Senior Programmer (Chief Developer of client solutions, customized client systems to function to spec)

- Developed multitudes of innovative custom solutions to meet client needs. Most of these solutions were developed to function within an already existing application framework such as adding customizations to the Magento Framework or to the CMS Made Simple framework.
- Developed custom PHP based Podcast generator which includes both audio and video content.
- Assisted in developing initial specs and with the project review process to ensure that projects being signed off on as complete genuinely met client specifications in all browsers.
- Implemented online marketing performance analysis and improvements for many customers including the addition of Google Analytics, Google AdSense, and Google Web Master Tools. Then developed successful online marketing campaigns for many clients using the collected site demographic and site analytics data.

Software and Development Skills

- Software: Microsoft Visual Studio, Eclipse, ZEND Studio, multiple project management and CMS systems
- Languages: Microsoft .NET Framework, C#, T-SQL, JavaScript, jQuery, PHP, HTML, CSS, XML, XSLT, JSON
- Database Systems: Microsoft SQL Server 2000 – 2008R2, MySQL, Microsoft Access

Education

North Central State College, Mansfield, OH - 2002

Associates Degree, Computer Science

Microsoft Certified Professional (MCP) focused on the .NET Framework - 2002

Additional Achievements / Activities

President of the Seneca County Toastmasters Club #1845 - July 2011 - present

Member of the Seneca County Toastmasters Club #1845 - August 2010 - present

Competent Communications Award achieved - October 2011
